State of AI

My notes on AI stuff that I am interested in learning more about.

AI REVIEW PASSED.

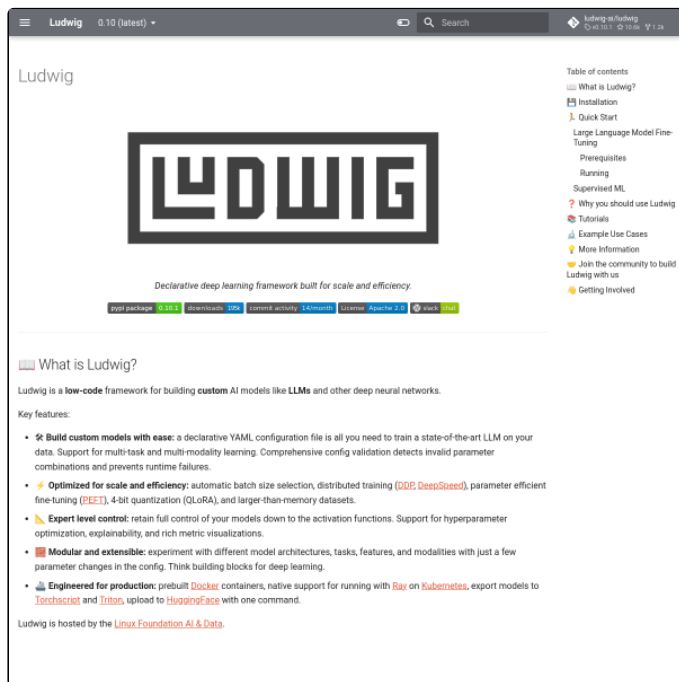

Scaling LLMs Using LoRAX (LoRA eXchange)

LoRAX is a framework that enables serving thousands of fine-tuned models efficiently on a single GPU by having the models share low-level weights and only keep separate the specialized high-level weights.

Scaling LLM Using Ludwig

Ludwig is a low-code framework for building custom AI models like LLMs and other deep neural networks.
