ShowNote Bugs

We don't have any bugs in this platform.

Surely you believe that!

Not!???

TABLE OF CONTENTS

1. Onboarding Simplification for Invited Users
2. ShowNotes Description Links are Not Tracked?
3. Home page personalization for users
4. Group access
5. Switch to GPT-4o immediately
6. Move to top (from bottom) swaps, not moves
7. Digest sends out new shows too fast

AI REVIEW PASSED.

Onboarding Simplification for Invited Users

I want to be able to send email invites to people whose account will be already created for them to reduce onboarding issues. They will simply have to set their password. If they don't they still have cookies on the current device and if they ever come back, they can reset the password.

However, when inviting them to a specific shownotes, we must be take them to the shownotes after password is set or skipped.

ShowNotes Description Links are Not Tracked?

It seems like the main ShowNotes links are not being tracked.

453 days 17 hrs ago

Home page personalization for users

Logged in users should see different content on the homepage. Showing the same video and text to send them up he wasted resource

447 days 5 hrs ago

Move to top (from bottom) swaps, not moves

If you click the "move down" button on the Last note on a ShowNote, it SWAPS the first and last note, rather than moving the last note directly to the top.

Digest sends out new shows too fast

The digest is registering/announcing new shows too fast, often before the author has had a chance to add in some notes.
