Best AI Tools for Founders

I use many AI tools to manage my startup marketing and research tasks. I will share the AI tools I use on a daily basis.

AI REVIEW PASSED.

PI AI - the FREE AI for creative tasks

This is a great Al tool for free! You can generate some really great creative contents using this Al. This Large Langauge Model (LLM) is good for many general tasks.

Discover ChatGPT: The World's Premier Language Model

This one is most widely used LLM in the world. However, I mostly use it for code snippets and complex analytical tasks and most often rely on the GPT-4 version. You can also generate images or analyze existing images using this LLM.

PS: I am using the PAID version which cost \$20/mon.

Claude 3 - The Constitutional Al

Clade 3 has a huge context window of 200K so it can take large input data. I usually use it for processing large PDF files to summarize or analyze or derive information from large amount of data.
