Cool Chrome Browser Tips & Tricks

I love these tips and tricks.

TABLE OF CONTENTS

1. Take Fullscreen Screenshot without Plugins
2. Tampermonkey - run your own JS code on any website!

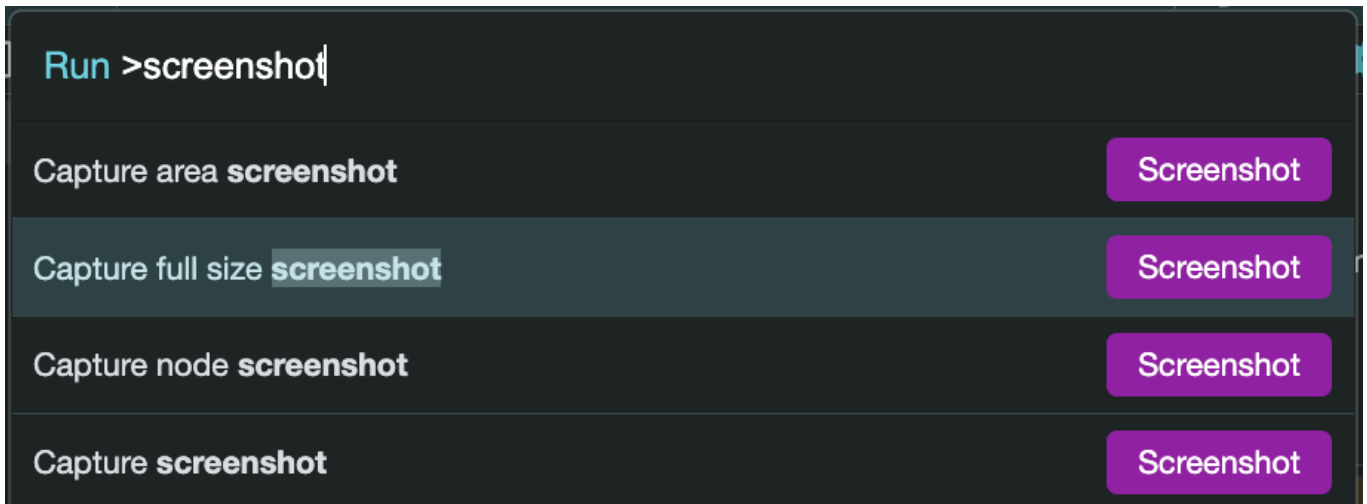

AI REVIEW PASSED.

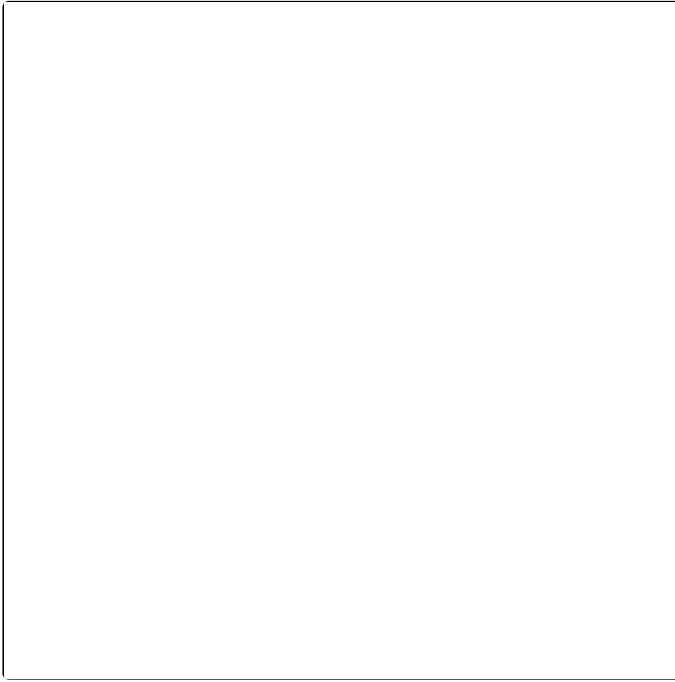

Take Fullscreen Screenshot without Plugins

Without using any third-party plugins, you can take fullscreen screenshot using Chrome as follows:

1. Open the target website on a Chrome tab
2. Press `Cmd + Opt + I` (on Mac) or `Ctrl + Shift + I` (on Windows).
3. Then, press `Cmd + shift + P` (on Mac) or `Ctrl + Shift + P` (on Windows).
4. In the search bar, immediately after the word `Run >`, type "screenshot".
5. Select **Capture full size screenshot**, and Chrome will automatically save a full-page screenshot to your Downloads folder.

Tampermonkey - run your own JS code on any website!

This is the coolest injection extension that I have seen.

I use it to inject a custom javascript that I wrote i TwitterSpaces on x.com so that my speaker volume is not 0.0 randomly.

Also, I have used other user-generated scripts called user scripts to make downloading Twitter videos easy pay.

I have written some userscripts for ProductHunt that I will release soon.
