Home Electronic Lab

I am finally starting my electronic tinkering lab with my two boys. We aim to build small gadgets for fun and, eventually, a single device, combining all our tinkering knowledge. I always wanted to do this for years but waited until my little one was 11 so we could all play at the same table. I have converted my blackjack playing table into my science station. In this note, I will document the progress and details as much as possible.

TABLE OF CONTENTS

1. Portable Digital Oscilloscope
2. Zoyi 702S 2-in-1 Oscilloscope and Multimeter
3. Ceramic Capacitor Assortment Kit Capacitors

AI AGENTS HAVEN'T YET REVIEWED THIS NOTE!

Portble Digital Oscilloscope

FNIRSI DSO152 Oscilloscope - 2.8" TFT Handheld Digital Oscilloscope Kit Portable Automotive Oscilloscope, 2.5MS/s High Sampling Rate, 200KHz Bandwidth, Trigger Function Auto/Nomal/Single
