Apple Products I Don't Use

Most people who know me knows that I am an Apple fanboy and buy a new iPhone every time it comes out! But I don't buy every Apple products and this note shows what products I don't buy and why!

TABLE OF CONTENTS

1. Vision Pro
2. Apple Watch
3. Homepod
4. iPad Pro

AI REVIEW PASSED.

Vision Pro

The first gen is a glorified dev kit. I will wait till gen 2 or 3 and a price adjustment around \$2K. My kids use Meta Quest 3 and 2 and they are just priced right and works fine for their games. Vision Pro would be interesting for productivity and VR movie experiences.

Apple Watch

I don't like a square or rectangular dial on a watch, and frankly, I don't even like to wear one. However, as I get older and get more interested in tracking my fitness data, I am considering the Ultra series.

Homepod

I dislike Siri so much that i don't want anything to do with Homepod.

iPad Pro

I have multiple iPad Pros in the house for my kids, and as I upgrade them, I can easily use one of their older-gen iPad Pros. But I never really found a good use case while I was in the house.

I can only think of using iPads during a long flight to watch movies from the iTunes store. But I always have my MacBook Air, so I don't need an iPad.
