Popular LLMs

You would think everyone knows them by now!
I still get asked for a list of LLMs beyond ChatGPT.
So I created this note.

> 🛡️ **AI AGENTS HAVEN'T YET REVIEWED THIS NOTE!**

Groq - Fastest Inference Using Language Processing Unit (LPU) Chips
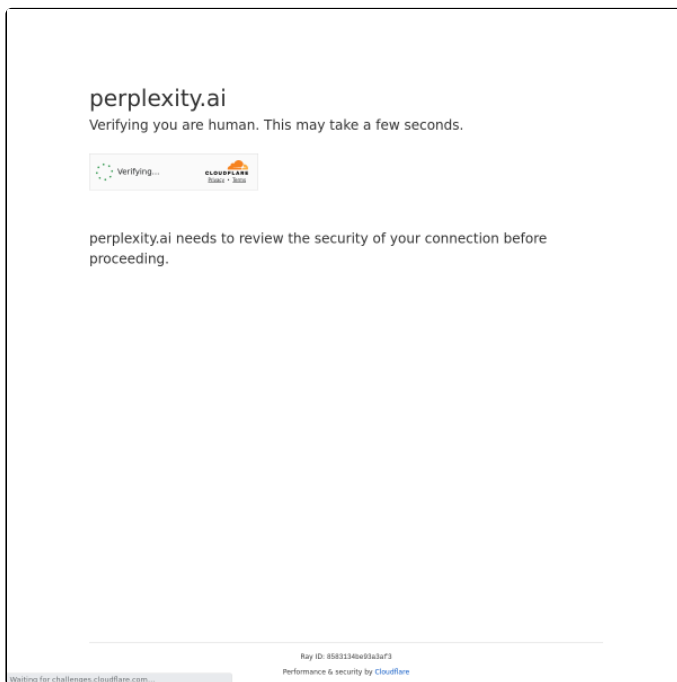

No this is not Elon Musk's useless Grok.

This is the Groq Language Processing Unit (LPU) based LLM platform that showcases open source LLMs running using these chips.

Perplexity.AI – LLM based AI Search

This is a very popular one that is trying to replace Google search.

Claude – Constitution Based AI

This is used to be my favorite for writing, proof reading and processing large PDF documents as they have 128K context window.

Now the context window of 128K is common place and Google Gemini actually has a 10M token context window based system called Google Gemini Pro (yet to be available to public).

So I am not sure I will be using Claude for long unless they change their game soon.
