Get Free Beta Testers using LinkedIn Jobs

Acquire hundreds free users for your product/SaaS with these steps:

- Post a free volunteer role on LinkedIn.
- Specify it's an unpaid, beta-testing position.
- Collect emails via Google Forms from interested applicants.
- Automate email invites using Zapier for beta-testing your web app.
- Repost the job listing every 6 hours for maximum visibility.

Note: Free LinkedIn job postings have a 150-view limit before being deprioritized by the algorithm.

Get 100s of Visitors to Your Startup

1. Visit Hacker News (news.ycombinator.com), a popular platform for technology and startup-related news and discussions.
2. Browse the latest posts to identify topics relevant to your product or service.
3. Engage in these discussions by providing valuable insights, experiences, or suggestions to showcase your expertise in the field.
4. include a link to your website in the comment section when sharing your thoughts.
5. Hacker News allows links in comments, unlike in their main posts.

By actively participating in relevant discussions and offering helpful advice, you'll attract interested users to your website.

This strategy can drive thousands of visitors to your landing page, increasing your product's visibility and fostering valuable connections within the tech community
